

KUNAL PANDEY

B.Tech Electronics & Communication Engineering | 3rd Year | Backend Developer

kunalpandey.12dev@gmail.com | +91 9060695473 | github.com/kunal-pandey12 | linkedin.com/in/kunal-pandey-2023792a4

OBJECTIVE

Motivated ECE undergraduate with strong backend development skills in Java and Spring Boot, seeking an internship to apply real-world problem-solving abilities. Experienced in building REST APIs, role-based authentication, and database-driven applications using Spring Security and MySQL.

SKILLS

Languages:	Java, SQL
Frameworks:	Spring Boot, Spring MVC, Spring Security, Hibernate / JPA, Thymeleaf, Bootstrap
Database:	MySQL
Concepts:	REST API Design, Role-Based Access Control (RBAC), ORM, CRUD Operations, MVC Architecture
Tools:	Git, GitHub, IntelliJ IDEA, Postman

CERTIFICATIONS

- Programming using Java — Infosys Springboard | April 2026
- Claude AI: From Basics to Build — Physics Wallah | June 2026

PROJECTS

Library Management System (LMS) — Completed

Java · Spring Boot · MySQL · Spring Security · Thymeleaf · Bootstrap · REST API

- Developed full-stack LMS with role-based access control (Admin, User) using Spring Security for authentication and authorization.
- Built REST APIs for book management, issue/return tracking with BCrypt password encoding for secure authentication.
- Designed normalized relational database with 4 tables — author, user, book, and issue — ensuring data integrity.
- Implemented automated fine calculation — Rs. 10/day penalty if book not returned within 7 days.
- Developed role-specific dashboard — Admin views issued books, stock, and fines; Users track their issued books and due amount.
- Integrated Thymeleaf + Bootstrap UI for responsive frontend; AI-assisted UI with full backend ownership.

BMS — Book My Show Clone [In Progress · 60%]

Java · Spring Boot · MySQL · REST API

- Designed 9-entity relational data model — Movie, Theater, Screen, Show, Seat, ShowSeat, Booking, Payment, User.
- Built REST APIs for movie listing, show scheduling, and seat booking using Spring Boot.
- Implemented custom exception handling — SeatUnavailableException, ResourceNotFoundException with GlobalExceptionHandler.
- Used DTO pattern to separate API layer from database models ensuring clean architecture.

EDUCATION

B.Tech — Electronics & Communication Engineering

2023 – 2027

IES College of Technology | RGPV, Bhopal | CGPA: 7.18 / 10

ACHIEVEMENTS

- Participated in State/National Level Hackathon — received participation certificate; collaborated on a tech solution under time constraints.
- Successfully delivered a complete full-stack Library Management System with role-based security as a self-initiated academic project.
